

SPDC30R

30" Demolition Chisel

Features and Benefits

- Tough 3/4" steel alloy hex bar with 20" exposed shank for extra reach and more comfortable working position
- 10" crown handle protects hands and fingers from off-center hammer strikes and provides ability to grasp with two hands
- Large 1-5/8" solid steel striker cap for maximum striking force
- Bar features a 1-1/8" precision-ground tip that maintains a sharp edge
- Handle material resists most shop fluids and temperature extremes
- Made in the U.S.A.

Specifications

Length, inches	30
Hex Shank, inches	3/4
Tip Width, inches	1-1/8
Weight, lbs	3.88

Applications

General automotive techs, truck/diesel techs, ag/construction mechanics, salvage, industrial, concrete/masons. Tool can be used for a number of general applications (similar to SPDC18 series) but with added length for clearance/reach. Automotive frame, suspension work, separating large components, breaking off debris from vehicle/truck parts, etc.
